Collapsing in Lick Creek

Lick Creek
Northern Gallatin
1/2/2019
Code
Latitude
45.52410
Longitude
-110.95600
Notes

Skiers in Lick Creek found buried facets and experienced collapsing today. From the email: "Found the same snowpack as Eric observed on Mt. Ellis yesterday. The meadow this morning was south facing. Almost all open areas had the recent new snow sitting on top of facets to the ground. Supportable enough to ski. Heard a couple whumpfs skinning up on steeper sections. No wind impact."
