Thin wind slab on Blaze Mtn.

Northern Madison
2/25/2022
Code
HS-AS-R1-D1
Latitude
45.36880
Longitude
-111.41200
Notes

Small skier triggered slides on Blaze Mountain.

From obs on 2/25/22: "I did get a couple new wind pillows to break and move somewhat forcefully while walking near the summit of Blaze, in an area with a very shallow snowpack. These were sitting on top of some large, old facets, and while they were relatively small, they definitely could have knocked me down in more consequential terrain."
