Large Natural Avalanche on Fan Mtn.

Fan Mountain
Northern Madison
1/30/2020
Code
G
Aspect
N
Latitude
45.29810
Longitude
-111.52400
Notes

From email: "There was a large avalanche on the north face of Fan. It is not on the NE Face that everyone skis, but out to the west of the north couloir where there is a major ridge off the summit. North aspect, estimated at over 1K ft. wide, to the ground with a deep crown. Likely triggered by cornice fall."
