Natural avalanche on Miller Ridge

Miller Ridge
Cooke City
12/11/2023
Code
D2
Aspect
SE
Latitude
45.04230
Longitude
-109.96500
Notes

From email: "Noted one recent large slab avalanche on a SE aspect of Miller Ridge. Estimated to be about 100' wide and 1-4' deep. It ran about 1/3 track or 600' vert. No fresh snow on the debris, so it likely ran at the end of the last snowfall event."

Date is approximate.
