Avalanche along Buck Ridge

Buck Ridge
Northern Madison
1/29/2023
Code
AM-R1-D1
Latitude
45.18360
Longitude
-111.46700
Notes

Avalanche (possibly sled/human triggered) on an easy to northeast facing slope around 9300 feet. There were lots of sled tracks on the slope, which is located just out of the wilderness at the far end of Buck Ridge. Slide and sled tracks appeared to be from after the weekend storm and were covered with light snow from the last couple days. Noted lots of wind transported snow along buck ridge this afternoon.
