Several large wet slides in north bowl

Date
Mon, 05/01/2023 - 14:55
Activity
Skiing

Pictures from this morning (May 1) but I'm sure these all ran late last week. They took out at least one or two skin tracks set during the big dump (40") that ran right up the center.

Unconsolidated, dripping wet snow this morning mid mountain around 830 AM. Top 3-4" had frozen but soft by 830.

Region
Bridger Range
Location (from list)
Bridger Bowl
Observer Name
Alan Crawford
