Old Unreactive Windslabs in Comet Alley

Date
Fri, 11/15/2024 - 15:15
Activity
Ice Climbing

Encountered a 6-8" old, unreactive windslab in Comet Alley yesterday. NE Aspect, ~8300'. Couldn't find a weak layer beneath it. Overall, the snowpack felt fairly homogenous on this aspect in this area.

Region
Northern Gallatin
Location (from list)
Hyalite - East Fork
