

Point release stepped down to deep slab on Emigrant

Date

Sun, 03/19/2023 - 14:00

Activity

Skiing

Yesterday we toured up into Emigrant gulch. At around 2pm we observed a small point release on the East face of Emigrant, either a small cornice break or wet loose, that ran for about 200ft before stepping down to a deep slab that appeared to be about 3ft deep and 100ft across.

Region

Out of Advisory Area

Location (from list)

Emigrant Peak
