

Recent Natural Avalanche near Cooke City

Date

Sun, 04/02/2023 - 16:40

Activity

Skiing

From Email:

"Observed a fresh natural avalanche this afternoon on Woody Ridge. The avalanche occurred on a NW [aspect](#), around 9200' (likely last night). I'd estimate the size to be 1-3' deep, and about 100' wide.

No other avalanche activity observed today. (ski tour up Republic Creek this morning, low visibility while I was up there).

No collapsing. Minor cracking of the fresh, dense wind drifts, though they felt quite stubborn.

New snow: about 10", dense/ rimed forms."

Region

Cooke City

Location (from list)

Republic Creek

Observer Name

Beau Fredlund
