

Skier remotely triggered slide in Wolverine Bowl

Date

Wed, 04/05/2023 - 12:10

Activity

Skiing

Skinner triggered slide north of the hourglass. Run name unknown. Remotely triggered from ridge line; snowboarder said he was skinning 35 feet away from trigger point; no one buried. I also observed point releases as I was skinning up to texas meadows; snow seemed to change quickly under blue skies and increasing temperature. Slide ran in front of me, taking out the skin track.

Region

Bridger Range

Location (from list)

Wolverine Bowl

Observer Name

Ryan
