

Reas peak crack/shifting

Date

Wed, 12/27/2023 - 13:30

Activity

Snowmobiling

Was climbing up a steeper area on the east side of Reas peak. Near the 2/3 point up the hill I watched a large crack suddenly open up 1-2" wide in the snow and I crossed over it. The slab did not slide. The depth or total length of the crack is unknown.

Region

Island Park

Location (from list)

Reas Peak
