

## natural loose snow slides in Bridgers

Bridger Peak  
Bridger Range  
4/5/2025  
Code  
L-N-R1-D1.5  
Elevation  
8500  
Aspect  
E  
Latitude  
45.77010  
Longitude  
-110.94000  
Notes

Observed multiple D1-1.5 natural dry loose avalanches (and some tiny [wind slab](#) pockets under the ridge [cornice](#)) that likely occurred during peak warming around 2-3 PM. North/sheltered aspects from ~9- 8.5k held an average of 8+ inches of dry, drifted snow. Early AM to mid-afternoon, very active wind transport followed by tapered winds and a rapid increase in temp.
