

From an email: "Just wanted to let you know that I observed a decent size avalanche yesterday skiing up in the Mill Creek area. The aspect of the slope was NE, approx start point @ 9922' it ran for 300 yards, approx 100' wide, started as point release but released a 1' deep loose slab on side of chute. The debris pile at the bottom was 7.5' deep." Photo: D. Sene
